The radar chart displays the distribution of 15 cognitive and motor functions across four groups: Healthy (blue), MCI (green), AD (red), and DLB (yellow). The functions are categorized into Motor (action, attention, awareness, emotion, pain, speech, semantics, switching, WM, conflict, novelty, inhibition, categorization, gaze). The chart shows that DLB has the highest scores in most categories, particularly in action, attention, and awareness. AD also shows high scores in several categories, while MCI and Healthy groups show lower scores overall.
